

## 2300 Series Zero Turn Mower

The 2300 Series features the latest in components and technology to ensure the best performance and mowing quality for your investment. With two mower deck size options from which to choose, a 52" stamped steel mower deck or a 48" fabricated mower deck. You'll be sure to get a great looking lawn with some time to spare.

Soft-touch, twin lever control lets you glide through turns and around obstacles controlling ground speed with spin-on-a-dime maneuverability.

Experience the same great cut you expect with added durability of a fabricated mower deck (available on 25/48).

Cast-iron axle pivots with the ground contours allowing the mower to ride smoothly over the lawn, while hanging from the rider frame. Cast-iron delivers the strength needed for the unique design.
