

# 3900 Series Zero Turn Mower

The Massey Ferguson® 3900 Series zero turn is designed to exceed expectations with commercial-grade features that deliver superior performance and a consistent, professional quality-of-cut. It offers a Briggs & Stratton Commercial Turf Series™ Engine, professional-grade fabricated mower deck and heavy-duty Hydro-Gear® ZT-5400 Powertrain® transaxles. This zero turn mower makes short work of large properties.

The cutting system allows for better airflow, discharge and superior cut quality. The slope nose of the deck forces the blades of grass forward and allows them a longer period of time to rise in the chamber before the blades make contact. The extra wide chute opening cleanly disperses grass clippings.

The Commercial Turf Series™ Engine is built for zero turn mowers and designed to perform under harsh, demanding conditions. With its patented five-step integrated cyclonic air management system, this Briggs & Stratton® Engine provides ultimate dust and debris protection for extended engine life.

Dual Hydro-Gear® ZT-5400 Powertrain® commercial engineered transaxles with cooling fans. Designed for heavy-duty commercial applications, this transaxle delivers smooth, infinitely variable speed and bi-directional control in one rugged integrated package.

## Features

27 gross hp\* Briggs & Stratton Commercial Turf Series™ V-Twin Engine

36 gross hp\* Briggs & Stratton Vanguard™ BIG BLOCK™ V-Twin Engine

61" or 72" professional-grade fabricated mower deck with a slope nose design to enhance airflow and cut quality. Features a limited lifetime warranty\*\*

Dual Hydro-Gear® ZT-5400 Powertrain® Transaxles

Hydro cooling fans

Heavy-duty frame rails

Cast-iron greaseable spindles for longer usable life, 1" shaft with top access grease fitting

Flip-up seat and seat pan for ease of maintenance

Ergonomic control panels with cup holder and storage compartment

Roll Over Protective Structure (ROPS)

Five-bolt pattern wheels
